

smart flooring for sustainable living

Offer your customers the ability to make the most sustainable flooring system, terrazzo flooring, more environmentally friendly than ever. ecoTrazzo is a thin-set epoxy terrazzo flooring system designed to provide additional green benefits relative to traditional poured-in-place terrazzo systems.

ecoTrazzo

The key components to an ecoTrazzo floor include the incorporation of sustainable chips and VOC-Free binders.

Sustainable Aggregate

ecoTrazzo offers multiple sustainable aggregate options for your terrazzo floor. Choose from the following terrazzo chip options.

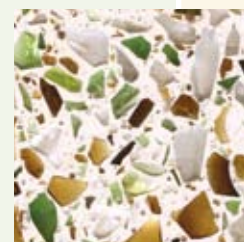

Recycled Concrete Aggregate

These aggregates are comprised of **recycled concrete** removed from the waste stream for use in ecoTrazzo flooring. These chips are crushed for use with terrazzo flooring in standard #2, #1 and #0 sizes.

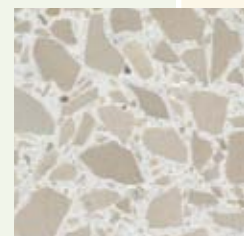

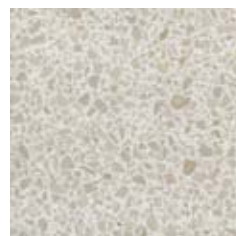

Recycled Glass Aggregate

These aggregates are comprised of **recycled glass** removed from the waste stream for use in ecoTrazzo flooring. These chips are crushed for use with terrazzo flooring in standard #2, #1 and #0 sizes.

Recycled Porcelain Aggregate

North American Aggregate

An assortment of North American marble aggregates are available from various regional quarries across the country. ecoTrazzo flooring will only incorporate those marble aggregates which are quarried and processed within 500 miles of your project site.

Domestic North American Aggregate:

Marble Falls, TX	San Saba, TX	Burnet, TX	Chewelah, WA	Marysville, WA
DeSoto, MO	Lone Pine, CA	Mosinee, WI	Talking Rock, GA	Madoc, Ontario

All marble aggregates are processed or quarried domestically rather than imported from overseas, helping to reduce the carbon footprint.

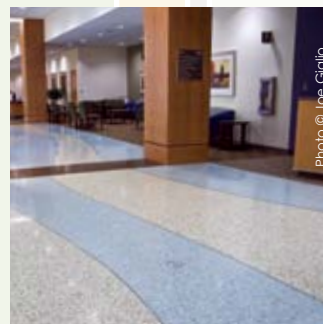

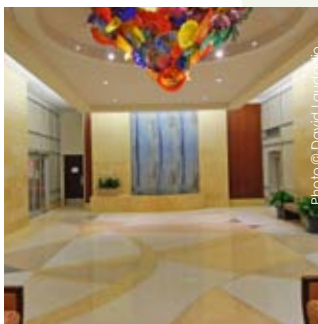

Terroxy® Resin Systems VOC-Free Epoxy Matrix

The binder used for ecoTrazzo flooring incorporates ZERO volatile organic compounds. Therefore epoxy matrix will not threaten the indoor air quality with potentially harmful off gassing during or after the installation of an ecoTrazzo floor. Terroxy® is manufactured in multiple locations across the country. For those projects located 500 miles from West Chicago, IL and Vernon, Ca Terroxy® is also considered a regional material.

Thin-set epoxy terrazzo floors are manufactured on site providing a sanitary, grout joint free finish that will not promote the growth of mold or mildew.

Terrazzo Countertops

- All the benefits of terrazzo in a counter surface.
- Epoxy conertops are non-porous and resistant to stains.
- Available in CTS reducing freight cost and waste.

Terrazzo flooring has a long and rich history that dates back to the fifteenth century. Terrazzo is one of the original recycled products created centuries ago by Venetian workers utilizing the waste chips from slab marble processing.

Make the environmentally conscious choice when designing your client's terrazzo floor. Select ecoTrazzo and provide building owners with the most sustainable terrazzo flooring choice available today.
